Subject: RE: Stibnite Mine

Hi Brad. I have reserved a room for our meeting on Friday beginning at 9. You will need to check in at the service center and they will call me to meet you downstairs. The conference call number that I have reserved is: Ex. 6 Personal Privacy (PP) (code: Ex. 8 Personal Privacy (PP)). I will invite Lisa O'Hara this evening and will ask her to forward the invitation along to IDEQ staff that should be invited.

We would appreciate it if Midas could provide us with:

- 1) a large (preferably poster size) print of Figure ES-18 in the September 2016 Executive Summary of the Plan of Restoration and Operation.
- 2) A map of all groundwater monitoring wells highlighting the subset of wells sampled. The map should be oriented the same way as Figure ES-18.
- 3) A map of all locations of surface water monitoring wells and locations where surface water samples have been taken.
- 4) A map showing the locations of all soil background samples. Please provide the corresponding concentrations.
- 5)

Map of all surface oriented same correspond with figure 1-6

Gw map shows all 66 gw monitoring wells highlighting the subset of well samples and same as orientation as figure. ID locations of all 66 wells and highlight which ones minor.

All locations where did surface water monitoring
Locations of soil background samples and results

Finally, we would like a map that depicts all soil sampling locations as well as the corresponding concentrations. the showing the locations of Midas' water quality sampling
We're likely to have suggestions regarding sampling but we first need to hear your presentation and the rationale for choosing location. Please request the following maps in POSTER SIZE for Friday's meeting

Figure 1.6 Overall Site Layout

Locations of water quality sampling – 1) surface water 2) groundwater (same orientation as the Site Layout map) should include labeled tributaries to the EFSFSR

Subject: Stibnite Mine

Elizabeth:

This will confirm our meeting with you and Kathy Cerise on Friday at EPA starting at 9 am. We have set aside three hours to meet, although I expect we can be through our agenda in 2 hours or less. John Meyer will make Midas's presentation. Merissa Moeller and I will join you and Kathy. Please let me know if you plan for others to attend.

In order to keep everyone on the same page moving forward, we agreed in our call last Friday to set up a conference line and invite IDEQ to join in the call. Midas would also like to have its technical staff in Boise join by phone. Please confirm that you can make a conference line available and provide a call in number and time.

I understand from your May 9 e-mail (below) that you will send me a list of data needs/questions from Kathy tomorrow (Tuesday). I'll circulate those and suggest we set up a call on Wednesday with you, Kathy, me and John to firm up the agenda and our mutual expectations for the Friday meeting. John will be prepared with 15-20 slides addressing 1) the history of the Stibnite mine and restoration work to date; 2) the Plan of Restoration and Operations for a modern mine; and 3) the scope of work for a limited investigation of arsenic discharges from former operations identified during recent groundwater sampling. Our goal will be to develop a schedule for negotiating and implementing an Agreed Order with EPA and IDEQ this summer to allow sampling to proceed this work season.

Please let me know if you and Kathy can set aside 30 minutes to speak with John and me on Wednesday. Thanks

Bradley M. Marten

Hi Brad and Merissa. Kathy Cerise can make herself available on Wednesday and Friday (with a preference for a meeting after 12). I am free before 12:00 and after 1:30 on Wednesday and can be available any time on Friday, with a preference for a meeting after 1:30 on Friday. On Tuesday I will send you a list of the data/information that Kathy would like to obtain from Midas in order to evaluate the proposal.

Re: Stibnite Mine

Dear Brad,

On April 30, 2019, Midas Gold Corporation provided the Environmental Protection Agency Region 10 (EPA) and the Idaho Department of Environmental Quality (IDEQ) with a proposed settlement agreement to undertake a limited initial investigation into existing contamination at the Forest Service Smelter Waste Cell and the Defense Minerals Exploration Administration Dump (DMEA Dump) at the Stibnite Mine Site (Site). This letter pertains to the technical proposal set forth in the statement of work attached to the proposed settlement agreement. As we have discussed, if the government agencies and Midas can agree on the appropriate technical work to be done, we will need to discuss restructuring the agreement so that terms reflect EPA's standard administrative orders on consent. In addition, Midas has not yet substantiated its claim that it is a bona fide prospective purchaser.

On May 17, 2019, Midas met with EPA and IDEQ to explain its technical proposal to the agencies. Midas stated that the goal of performing the work proposed is to discover the sources of elevated levels of arsenic, antimony, and mercury in ground water and/or surface water at the Site. During the meeting, EPA and IDEQ agreed to evaluate the proposal to determine whether the work was appropriate.

After the meeting, EPA invited the United States Forest Service (USFS) to participate in the technical discussions with EPA and IDEQ because the proposed investigatory work involves USFS land. (For the same reason, USFS will need to be a signatory to any final agreement.) We have collectively evaluated the proposal and have concerns that the investigatory work will not achieve the stated purpose. The agencies do not believe that the USFS-constructed repository on the Northwest Bradley Waste Rock Dump is a significant source of the elevated arsenic concentrations measured in monitoring well MWH-A19. The repository was constructed on an elevated portion of the dump that does not contact groundwater. In addition, the repository was constructed with a low-permeability Geosynthetic Clay Liner (GCL) cover to minimize infiltration and percolation through the materials. Groundwater elevation contour data provided by Midas Gold indicates a northerly flow direction, such that MWH-A19 may not be directly downgradient from the repository. Finally, the downgradient monitoring well SRK-GM-03S shows no similarly elevated arsenic or selenium concentrations, which would be expected if the repository were a significant groundwater contaminant source.

As we discussed during the May 17th meeting, the agencies do not believe that Midas Gold's exploration soil sampling data are appropriate for determining background concentrations of metals in surface soils. Midas Gold collected samples from 0–16 inches below ground surface (bgs), with an average and median depth of 9 and 12 inches bgs, respectively. This exceeds the recommended 0–6 inches bgs sampling depth for assessing risk to human health and wildlife. The agencies recommend using the data sets presented in the 1998 Stibnite Site Characterization Report to establish site-specific background concentrations for mineralized and non-mineralized areas. Analysis of the Woodward-Clyde samples indicate an average of 6.99 ppm arsenic for non-mineralized areas. This is consistent with regional norms. The mineralized areas have an average of 87.51 ppm arsenic.

The agencies have discussed other potential projects that may be more successful in achieving the goal of determining the sources of arsenic, antimony and mercury. For instance, additional groundwater, storm event surface water, and sediment samples near the Bradley Waste Rock Dumps, the Keyway Wetland, Upper Wetland, and stream channels of the East Fork South Fork Salmon River, and tributaries upstream of the Sugar Creek confluence would be important work to perform to understand the sources of contamination. We would be happy to discuss in more detail what options the agencies have considered as alternatives to the investigatory work proposed by Midas Gold. Please let me know if you and your client are interested in meeting to have further technical discussions.

Best regards,

Elizabeth McKenna

Directions and procedures to 1200 Pennsylvania Avenue NW:

Metro: If you come by Metro get off at the Federal Triangle metro stop. Exit the metro station and go up two sets of escalators to the surface level and turn left. You will see a short staircase and wheelchair ramp leading to a set of glass doors with the EPA logo - that is the William Jefferson Clinton Federal Building, South Entrance.

Taxi: Direct the taxi to drop you off on 12th Street NW, between Constitution and Pennsylvania Avenues, at the elevator for the Federal Triangle metro stop - this is almost exactly half way between the two avenues on 12th Street NW. Facing the building with the EPA logo and American flags, walk toward the building and take the glass door on your left hand side with the escalators going down to the metro on your right— that is the South Lobby of the William Jefferson Clinton building.

Security Procedures: A government issued photo id is required to enter the building and it is suggested you arrive 15 minutes early in order to be cleared and arrive at the meeting room on time. Upon entering the lobby, the meeting attendees will be asked to pass through security and provide a photo ID for entrance. Let the guards know that you were instructed to call 202-564-2440 for a security escort.

Elizabeth and Lisa –

On behalf of Midas Gold, I am transmitting the attached draft Voluntary Consent Order / Administrative Order on Consent. This draft is intended to frame initial discussions regarding Midas's proposal for limited investigation into historical mining contamination at the Stibnite Mining District. We look forward to your comments.

Sincerely,

Merissa A. Moeller

Ex. 6 Personal Privacy (PP)

I thought the meeting today went well, and thank you for organizing it. The "to dos" I took away are to start thinking about a model agreement (which I appreciate you want to do only after the technical team agrees upon a work plan) and to begin to work on resolving questions you may have around Midas's BFPP status. I'll keep working to get you the information you've requested, and would like to set up a time, maybe in a month, devoted to the BFPP status questions. Can you suggest a couple tentative dates in mid to late June?

Also -- you mentioned that you'd like to make sure the Forest Service is apprised, and I agree that's a good idea. Is there a Forest Service lawyer you work with on Stibnite mine issues?

I should add to my last email that it is not critical to get me the information tomorrow. I was in meetings all day today and didn't get to respond to you until this evening, so I understand that it might be difficult to get the information to me in time for my call with HQ (which is at 10 a.m.).

Elizabeth:

I am pulling together some of the records you requested when we met a few weeks ago, and the slides from the December presentation that Midas Gold made to EPA. I understand you have a Tuesday call with EPA Headquarters and would like to have that material (at least the slides). As we discussed, some of this information is Confidential Business Information ("CBI") and some of it reflects positions Midas has taken relevant to its status as a BFPP. I left our last meeting with the understanding that any materials provided by Midas to EPA would be considered by the agency to be exempt from disclosure by EPA under Exemption 4 of the FOIA regulations, and that EPA would take that position if a request for the information were received. <https://www.justice.gov/oip/foia-guide-2004-edition-exemption-4>

Can you confirm that understanding on behalf of EPA?

Hi Brad. Without seeing the documents, I can't determine if withholding specific documents is appropriate. I can think of two exemptions that may come into play – Exemption 7 and Exemption 4. Factual information regarding existing contamination would likely not be withheld. Certainly, if Midas has disclosed any of the information in the NEPA process, it would not be confidential. If Midas plans to claim certain information as CBI, it should include its basis for making a CBI claim with its submission of the information, which will help EPA evaluate the CBI claim if a FOIA for the information is submitted by another party.

Thanks, Brad. I'm happy to discuss this further if you'd like.

Subject: RE: Midas Gold/Stibnite Mine

No worries, and thanks. I'm going to lean on a lawyer here who just joined us from EPA's General Counsel's office and worked on FOIA issues for EPA. She knows the rules better than I do. Her name is Jennifer Hammitt.

I have been gathering quite a bit of site information for you that I'd like to share this week or as soon as possible, in response to your request the last time we met. We are also pulling together some slides to share on Thursday, specifically addressing two or three areas Midas would like to do some work in this summer, with approval from EPA and IDEQ.

I should add to my last email that it is not critical to get me the information tomorrow. I was in meetings all day today and didn't get to respond to you until this evening, so I understand that it might be difficult to get the information to me in time for my call with HQ (which is at 10 a.m.).

Elizabeth:

I am pulling together some of the records you requested when we met a few weeks ago, and the slides from the December presentation that Midas Gold made to EPA. I understand you have a Tuesday call with EPA Headquarters and would like to have that material (at least the slides). As we discussed, some of this information is Confidential Business Information ("CBI") and some of it reflects positions Midas has taken relevant to its status as a BFPP. I left our last meeting with the understanding that any materials provided by Midas to EPA would be considered by the agency to be exempt from disclosure by EPA under Exemption 4 of the FOIA regulations, and that EPA would take that position if a request for the information were received. <https://www.justice.gov/oip/foia-guide-2004-edition-exemption-4>

Can you confirm that understanding on behalf of EPA?

Elizabeth and Lisa –

On behalf of Midas Gold, I am transmitting the attached draft Voluntary Consent Order / Administrative Order on Consent. This draft is intended to frame initial discussions regarding Midas's proposal for limited investigation into historical mining contamination at the Stibnite Mining District. We look forward to your comments.

Sincerely,

Merissa A. Moeller

Hi Brad and Merissa. Kathy Cerise can make herself available on Wednesday and Friday (with a preference for a meeting after 12). I am free before 12:00 and after 1:30 on Wednesday and can be available any time on Friday, with a preference for a meeting after 1:30 on Friday. On Tuesday I will send you a list of the data/information that Kathy would like to obtain from Midas in order to evaluate the proposal.

Hello, Brad. It has been a very long time since we've worked together! I'd be happy to share my thoughts on the project with you. The most immediate issue currently is the transfer of certain information that EPA has requested from Midas. As you know, I've been talking with Michael Bogart about Site for the past several months. I left a message with Michael last week regarding transfer of information and I'd be happy to talk to you about that as well as broader issues. Can you talk or meet next week? I'd be interested to know more about the roles of each of the three firms retained by Midas so that I know who I should communicate with on different issues. I'll propose a few open times that I have on my calendar next week, but feel free to suggest others that might work better for you.

Tuesday, March 4th between 12:00 and 3:00
Wednesday, March 5th between 1:00 and 4:00
Thursday, March 6th between 10:00 and 1:00

Hi Brad. A few months ago Michael and Lauren gave a power point presentation to EPA in response to some of the questions EPA has asked Midas regarding its mining plan and proposal for a CERCLA cleanup agreement. Michael agreed to provide a copy of the power point to us, but we have not received it. I have a call on Tuesday with EPA HQ and it would be helpful if I had a copy of the presentation before that meeting. Would it be possible for you to obtain the slides for me before Tuesday? Thanks very much.

Elizabeth

Elizabeth:

IDEQ and Midas have set up a call next Thursday and I understand you will be joining as well. I am also going to join by phone. Do you want to take the call together? If so, at our office or yours?

Flag: Flag for follow up

Jim: Laurel and I are hoping to visit with you and Lynn Hood next Monday or Tuesday regarding two brief administrative matters related to the Stibnite Project. All we need is a half hour.

Thanks.

John

Thank you for your note. I was in St Louis yesterday at a DERP conference about two blocks away from Ex. 6 Personal Privacy (PP)

Ex. 6 Personal Privacy (PP)

I am traveling on the first two dates, but in the hope you are not booked, I blocked the noon hour on the 29th.

Peter – good seeing you at EPA last week. We talked about having lunch together.

Are you available May 16, 23, or 29?

And, I know you will soon be returning to: Ex. 6 Personal Privacy (PP)

Warm regards

John

Directions and procedures to 1200 Pennsylvania Avenue NW:

Metro: If you come by Metro get off at the Federal Triangle metro stop. Exit the metro station and go up two sets of escalators to the surface level and turn left. You will see a short staircase and wheelchair ramp leading to a set of glass doors with the EPA logo - that is the William Jefferson Clinton Federal Building, South Entrance.

Taxi: Direct the taxi to drop you off on 12th Street NW, between Constitution and Pennsylvania Avenues, at the elevator for the Federal Triangle metro stop - this is almost exactly half way between the two avenues on 12th Street NW. Facing the building with the EPA logo and American flags, walk toward the building and take the glass door on your left hand side with the escalators going down to the metro on your right— that is the South Lobby of the William Jefferson Clinton building.

Security Procedures: A government issued photo id is required to enter the building and it is suggested you arrive 15 minutes early in order to be cleared and arrive at the meeting room on time. Upon entering the lobby, the meeting attendees will be asked to pass through security and provide a photo ID for entrance. Let the guards know that you were instructed to call 202-564-2440 for a security escort.
